Eastern Idaho COVID-19 Economic Report | June 15, 2020

About the Report

The RBDC is tracking the economic impact of the COVID-19 outbreak on eastern Idaho. The report is compiled by RBDC student research teams and will be updated weekly. We hope you find the report helpful to you. We appreciate the organizations that have contributed funds to make this report available. Please contact Will Jenson (w.jenson@rbdcenter.org) if you would like to participate in our weekly industry surveys or would like to contribute to our report in some other way.

-Thank you

New This Week

- New unemployment claims went up in Bonneville, Jefferson, Madison and Blaine Counties. Continued unemployment claims continued to drop this week.
- Madison County had the lowest percentage of unemployment in the state during April. Blaine County had the highest.
- Residents of Rigby think that the economic situation in Rigby will improve a lot, while residents of Idaho Falls believe it will remain stable.
- Beauty salons in Eastern Idaho have seen a significant increase of clients compared to before the Stay at Home Order.
- Arrests and Criminal activity significantly dropped at the beginning of the Stay at Home order in March, and have continued to stay lower than normal.

Definitions

An **initial claim** is a claim filed by an unemployed individual after a separation from an employer. The claimant requests a determination of basic eligibility for the UI program. When an initial claim is filed with a state, certain programmatic activities take place and these result in activity counts including the count of initial claims. The count of initial claims for unemployment insurance is a leading economic indicator because it is an indication of emerging labor market conditions in the country. However, these are weekly administrative data which are difficult to seasonally adjust, making the series subject to some volatility.
