Eastern Idaho COVID-19 Economic Report | June 29, 2020

About the Report

The RBDC is tracking the economic impact of the COVID-19 outbreak on eastern Idaho. The report is compiled by RBDC student research teams and will be updated weekly. We hope you find the report helpful to you. We appreciate the organizations that have contributed funds to make this report available. Please contact Will Jenson (w.jenson@rbdcenter.org) if you would like to participate in our weekly industry surveys or would like to contribute to our report in some other way.

-Thank you

New This Week

- New Unemployment Claims in the state increased slightly this week, while Continued Unemployment Claims dropped this week
- Initial Unemployment Claims rose slightly in Bonneville, Madison, and Jefferson Counties, while they dropped in Blaine County
- Idaho is tied for #4 in the United States for Lowest Unemployment Rates in May 2020

Definitions

An **initial claim** is a claim filed by an unemployed individual after a separation from an employer. The claimant requests a determination of basic eligibility for the UI program. When an initial claim is filed with a state, certain programmatic activities take place and these result in activity counts including the count of initial claims. The count of initial claims for unemployment insurance is a leading economic indicator because it is an indication of emerging labor market conditions in the country. However, these are weekly administrative data which are difficult to seasonally adjust, making the series subject to some volatility.
