Eastern Idaho COVID-19 Economic Report | July 6, 2020

## About the Report

The RBDC is tracking the economic impact of the COVID-19 outbreak on eastern Idaho. The report is compiled by RBDC student research teams and will be updated weekly. We hope you find the report helpful to you. We appreciate the organizations that have contributed funds to make this report available. Please contact Will Jenson ([w.jenson@rbdcenter.org](mailto:w.jenson@rbdcenter.org)) if you would like to participate in our weekly industry surveys or would like to contribute to our report in some other way.

-Thank you

## New This Week

- State Total New Claims went up this week while Statewide Continued Claims dropped
- Bonneville and Blaine Counties Initial Claims went up this week while Jefferson and Madison Counties Initial Claims dropped
- Top Industry New Claims are from Accommodations and Food Service, Manufacturing, Retail, and Healthcare and Social Assistance

## Definitions

An **initial claim** is a claim filed by an unemployed individual after a separation from an employer. The claimant requests a determination of basic eligibility for the UI program. When an initial claim is filed with a state, certain programmatic activities take place and these result in activity counts including the count of initial claims. The count of initial claims for unemployment insurance is a leading economic indicator because it is an indication of emerging labor market conditions in the country. However, these are weekly administrative data which are difficult to seasonally adjust, making the series subject to some volatility.
