Eastern Idaho COVID-19 Economic Report | August 10, 2020

## About the Report

The RBDC is tracking the economic impact of the COVID-19 outbreak on eastern Idaho. The report is compiled by RBDC student research teams and will be updated weekly. We hope you find the report helpful to you. We appreciate the organizations that have contributed funds to make this report available. Please contact Will Jenson ([w.jenson@rbdcenter.org](mailto:w.jenson@rbdcenter.org)) if you would like to participate in our weekly industry surveys or would like to contribute to our report in some other way.

-Thank you

## New This Week

- Bannock County unemployment claims and job openings are contained in this report. After initial claims spiked during the weeks of June 27th and July 4th, initial claims have continued to decrease each week.
- Since the week of July 18th, unemployment claims have continued to drop each week in the state as well as nationally.

## Definitions

An **initial claim** is a claim filed by an unemployed individual after a separation from an employer. The claimant requests a determination of basic eligibility for the UI program. When an initial claim is filed with a state, certain programmatic activities take place and these result in activity counts including the count of initial claims. The count of initial claims for unemployment insurance is a leading economic indicator because it is an indication of emerging labor market conditions in the country. However, these are weekly administrative data which are difficult to seasonally adjust, making the series subject to some volatility.
