 - Bank Changes (<u>p34</u>)
 - Subprime Credit (<u>p35</u>)

Tourism

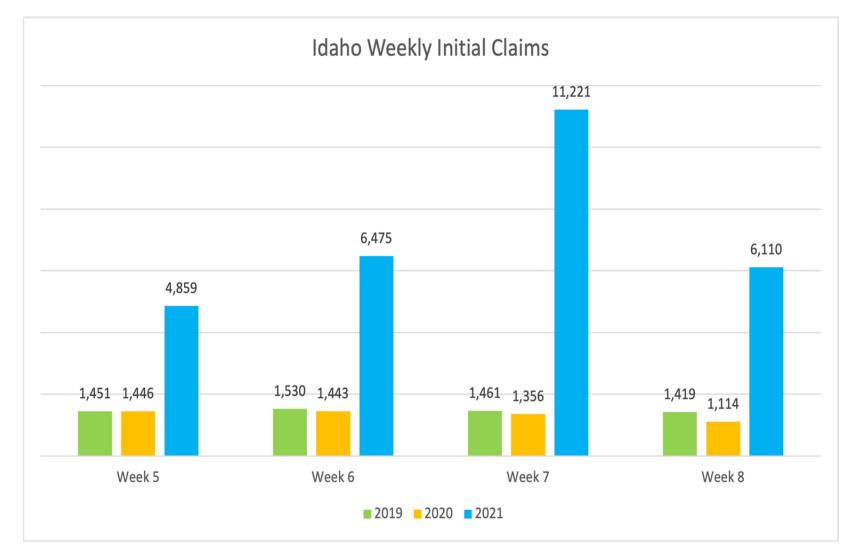

- National Park Visits (<u>p36</u>) Buildings
 - Applications (<u>p37</u>)
 - Applications Percent Change (p38)
 - Permits (p39)
 - Permit Types (<u>p40</u>)

Definition:

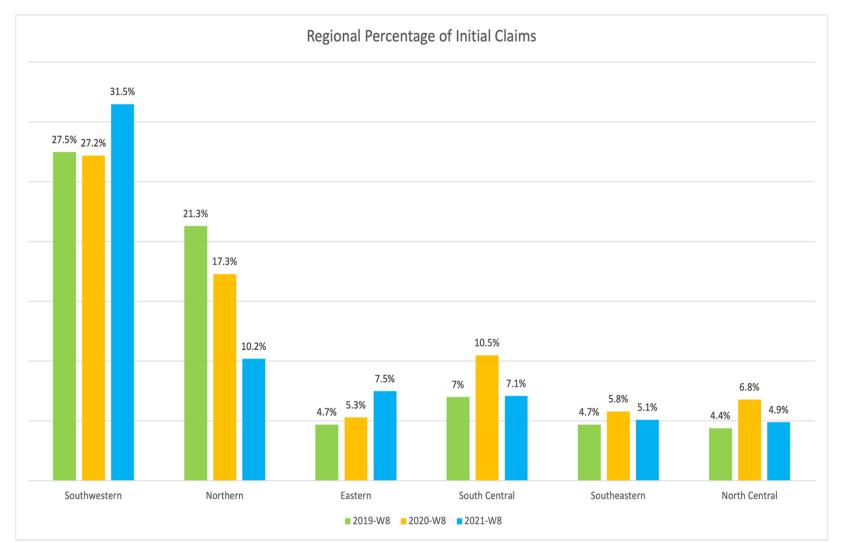

An initial claim is a claim filed by an unemployed individual after a separation from an employer. The claimant requests a determination of basic eligibility for the UI program. When an initial claim is filed with a state, certain programmatic activities take place and these result in activity counts including the count of initial claims. The count of U.S. initial claims for unemployment insurance is a leading economic indicator because it is an indication of emerging labor market conditions in the country. However, these are weekly administrative data which are difficult to seasonally adjust, making the series subject to some volatility.

- After a large spike in weekly initial claims for week 7, week 8 saw a drop back down to slightly less than the week 6 claims.
- Manufacturing, Healthcare Assistance, and Retail all saw a large increase for the week 7 initial claims which could explain why the increase was so large.

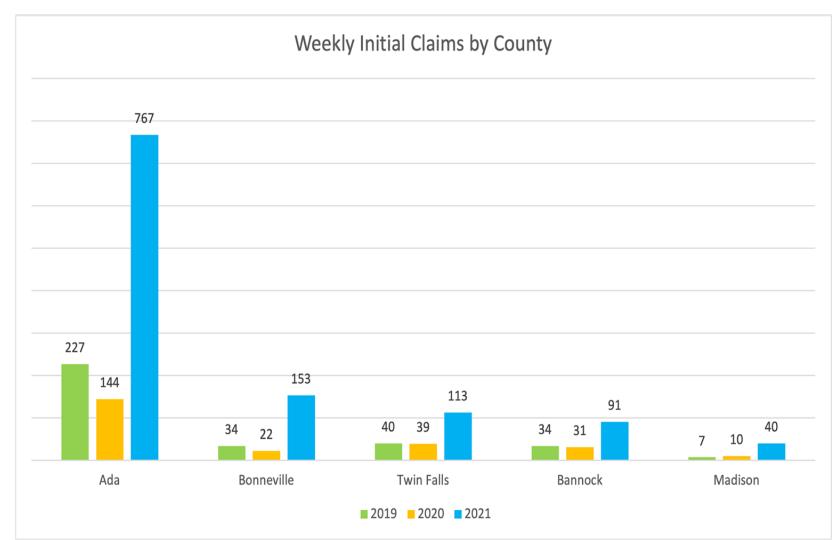

- The Southwestern region of Idaho increased its overall percentage of the state's initial claims compared to previous years.
- The only other region to increase its percentage was the Eastern region.
- The Northern region has improved by 10.1% over the previous two years.

Source: https://lmi.idaho.gov/ui-weekly-claims

Initial Claims (County)

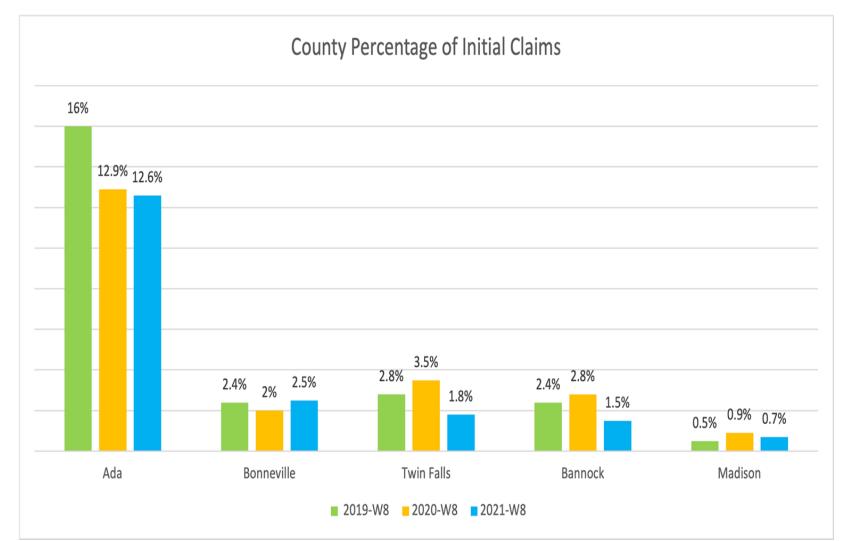

- All of the counties included decreased their weekly initial claims from week 7 to week 8.
- All of the counties included are still considerably higher than they have been at this point in previous years.
- Bonneville county has the largest overall increase from 2020 as it's 7x higher than it was at this point in 2020.

Initial Claims (County)

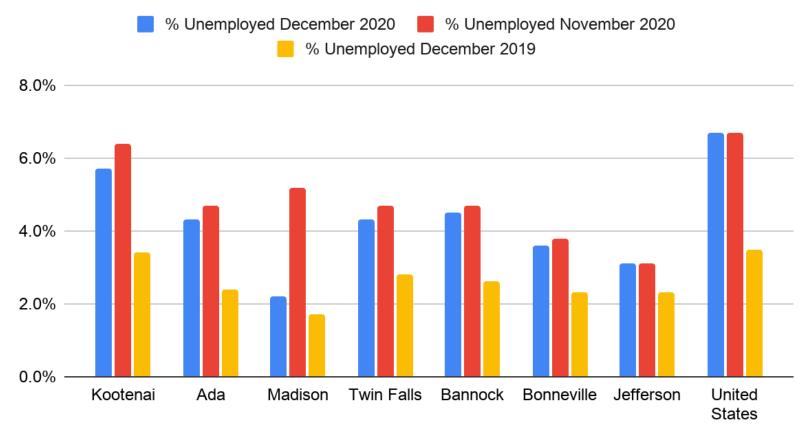

- Ada county has seen the best overall improvement as this week they accounted for only 12.6% compared to 16% in 2019 at the same point.
- Bonneville county is the only county included that increased its overall percentage of initial claims from 2020 to 2021.

Source: https://lmi.idaho.gov/ui-weekly-claims

Changes in Unemployment

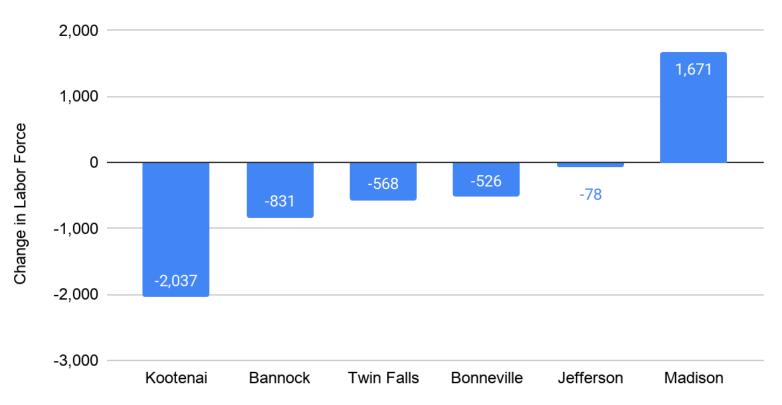

- Unemployment rates have gone down from November to December for all counties except Jefferson
- Year over year unemployment rates are still much higher
- Unemployment in Idaho counties versus the United States is much lower

Source: https://lmi.idaho.gov/laus

Change in Civilian Labor Force December 2020 vs. November 2020

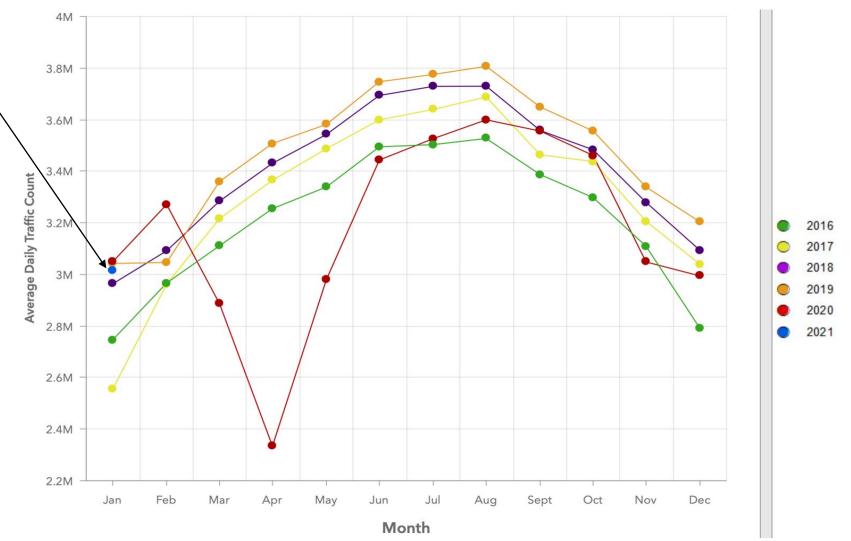

- Civilian Labor Force A count of noninstitutionalized persons 16 and older, excluding member of armed forces, who live in a specific geographic area and are classified as employed, unemployed and seeking employment, or involved in a labor dispute.
- Madison County had a drastically better month over month participation than other counties

Source: https://lmi.idaho.gov/laus

Traffic Trends (Statewide)

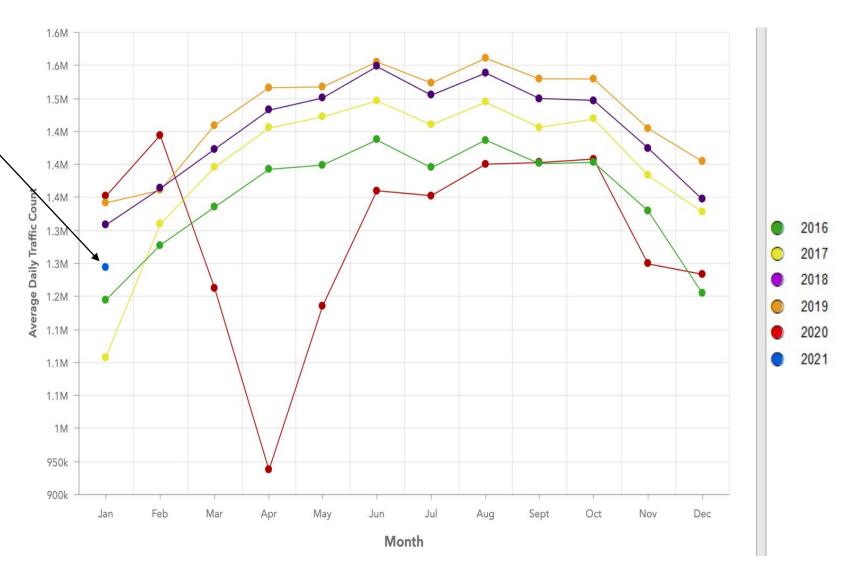

- January 2021 traffic counts for the state of Idaho were were barely below the January 2019 and 2020 counts.
- December 2020 traffic counts dropped to 3 million, the lowest in the previous 5 years except for 2016.
- The traffic counts for January 2021 should be an encouraging sign for people curious about the comfort level of people traveling despite the continuing pandemic.

Traffic Trends (Ada County)

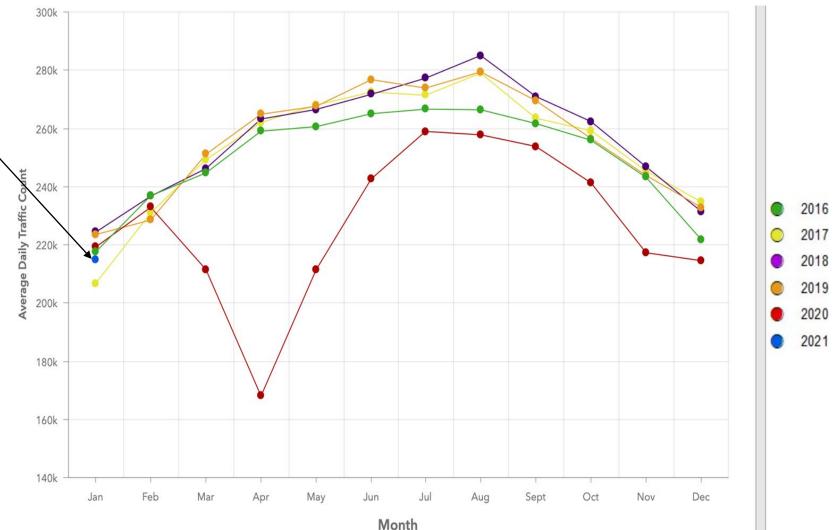

- Ada county started 2021 with the lowest traffic count in the month of January since 2017.
- The 2020 traffic counts began with the highest counts over the previous 6 years, the covid-19 pandemic impact from March onward brought the counts below all of the previous 6 years except for August, September, and December which briefly passed 2016 traffic counts.

Traffic Trends (Bannock County)

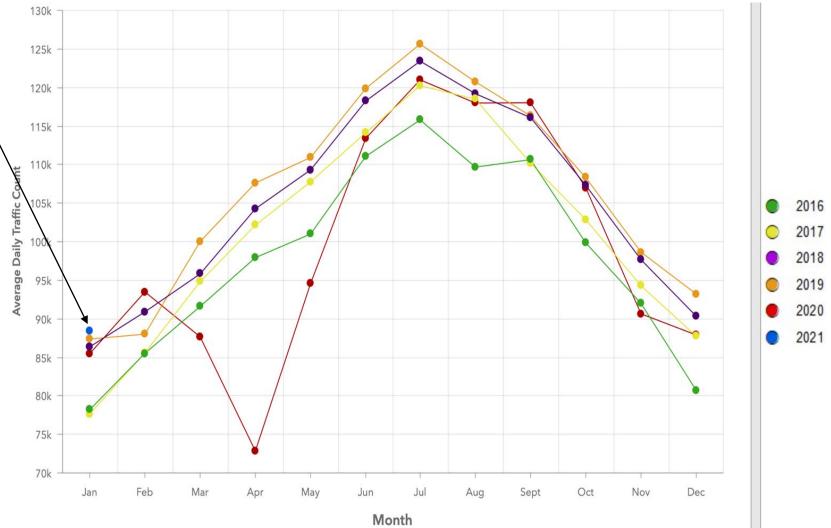

- Bannock county traffic counts began 2021 as the second lowest count in January over the previous 6 years.
- From the month of March onward in the year 2020, Bannock county never recovered to pre-pandemic level traffic counts. March to December of 2020 all had the lowest counts in the last 6 years.

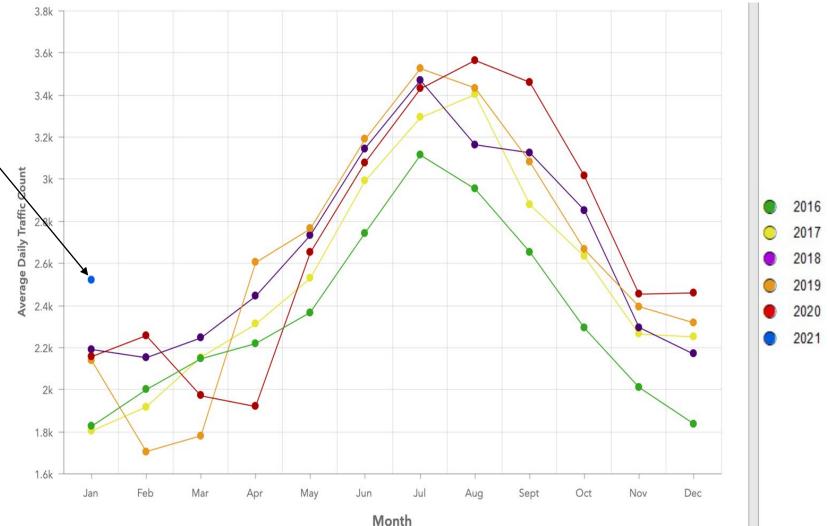

Traffic Trends (Bonneville County)

- Bonneville county traffic counts started 2021 with the highest January count in the last 6 years.
- After the Covid-19 impact in March of 2020, the traffic trends in Bonneville county briefly recovered to prepandemic levels before dropping in November.
- The December 2020 numbers stayed stable into January of 2021, the only December to January count that didn't decrease in the last 6 years.

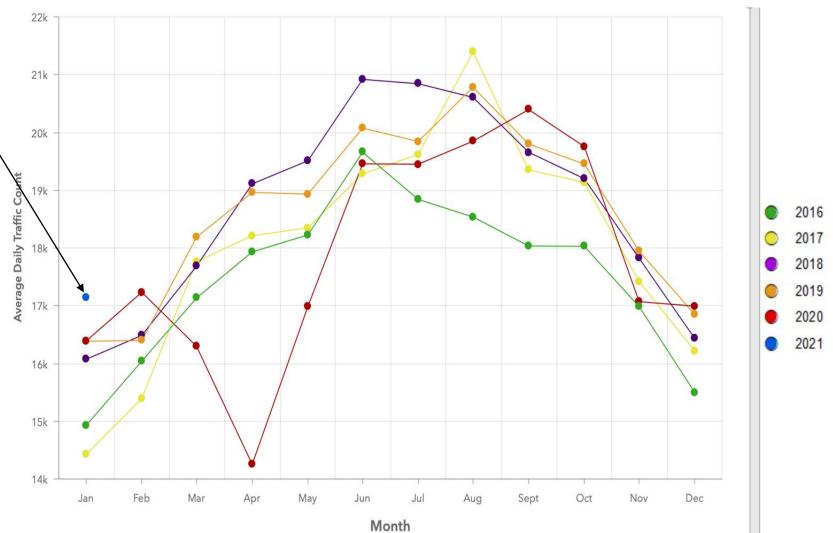

- Madison county traffic counts were significantly higher for January 2021 than they have been for previous years.
- The traffic counts could be Byu-Idaho students returning to on-campus classes.
- Madison county is also a common travel route for people going to visit Yellowstone which has seen higher than normal car counts to begin 2021.

Traffic Trends (Twin Falls County)

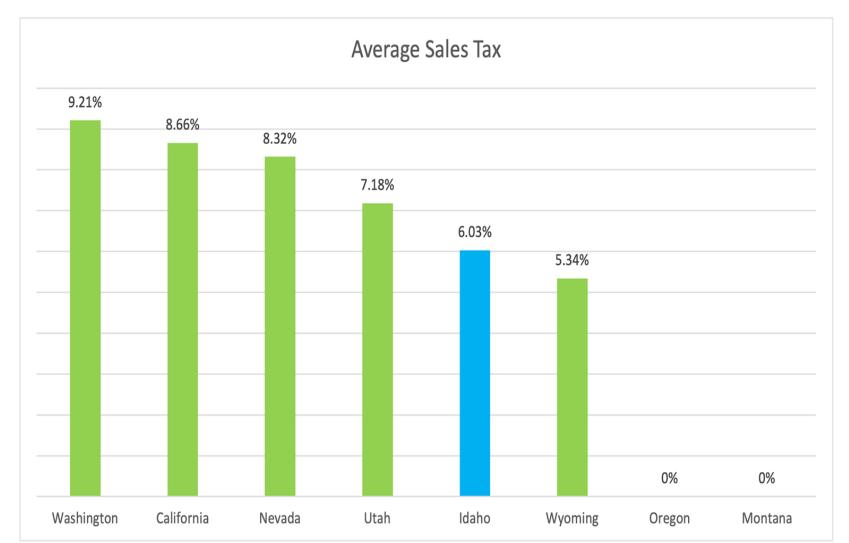

- Twin Falls county traffic counts were also much higher for January of 2021 than they have been in the previous 6 years.
- The 2020 traffic counts for the county began to recover from the Covid-19 impact in June and remained fairly stable for the rest of the year with a brief drop in November.
- The December 2020 counts were the highest for the month of December in the previous 6 years.

Source: https://itd.idaho.gov/road-data/

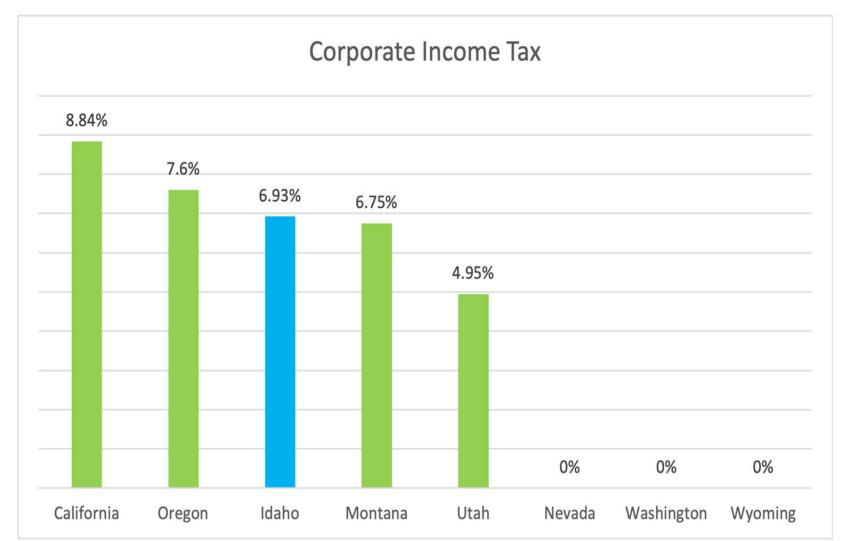

- Idaho currently ranks 37th in average sales tax. This is on a scale where the lower the number the higher the rate, meaning only 13 states have a lower sales tax rate than Idaho.
- Regionally Idaho is more of a middle ground with four of the surrounding states having a higher rate and three having less.

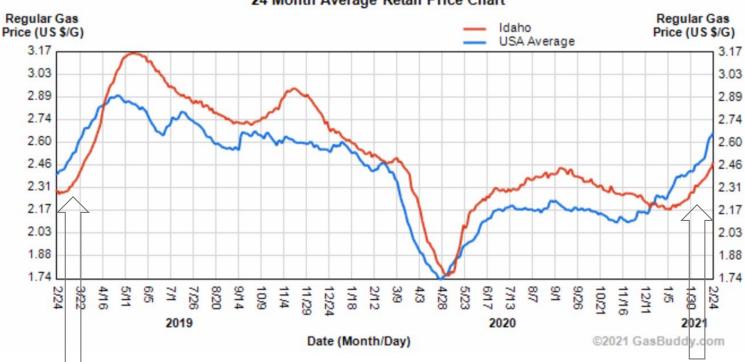

- Idaho is much higher on the Corporate Income Tax scale ranking 22nd. This means that 21 states have a higher corporate income tax, mainly on the East Coast.
- Regionally, only two states have a higher corporate income tax than the state of Idaho, these being CA and OR.
